YOUR STORY & GOALS:

Goals: My goal with this grant is to finish upgrading the space, purchase needed equipment, and invest in marketing so I can serve more clients and grow the business beyond its current capacity. The funds will help stabilize cash flow, finish build out of office spaces, and support the long-term plan of offering a full range of wellness services in our finished space.

Funding Need: If awarded, this \$50,000 grant will be used to strategically expand Hybrid Healing – Wellness Collective and elevate the quality, accessibility, and impact of the holistic services we provide to our community. Funding will support both infrastructure improvements and service enhancements, including:

1. Advanced Wellness Equipment

- Purchase of full-body Class II red-light therapy panels to expand our therapeutic offerings and increase client treatment capacity.
- Acquisition of a stationary massage table and additional specialized tools to support medical, sports, trauma-informed, and energy-based bodywork services.

2. Facility Enhancements & Renovations

- Creation of a therapeutic salt cave to offer respiratory and relaxation benefits to clients.
- Remodeling of each treatment room to improve comfort, privacy, and overall client experience.
- Plumbing improvements needed to safely and efficiently operate hydration services and IV therapy.
- Furniture and décor upgrades to create warm, inviting, trauma-informed healing spaces.
- Exterior remodeling and landscaping to enhance curb appeal and improve accessibility.

3. Operational & Service Investments

- Stocking up on products and supplies used in our services, ensuring consistent, high-quality care across IV therapy, massage, energy work, and wellness treatments.
- Funding for marketing and advertising, including Google integration, search optimization, and local outreach.
- Professional photography and videography to support content creation, branding, and digital presence.

4. Growth & Community Impact

- Hiring additional licensed staff to expand service availability and reduce wait times.
- Support for networking groups and community partnerships that increase reach and community education.
- Development of stationary marketing materials for events, collaborations, and educational initiatives.

Story: What makes us unique is the heart and intention behind our work as a husband-and-wife healing team. I bring the experience of a Registered Nurse who has cared for people during their most vulnerable moments, and my husband brings the grounding, restorative work of a trauma-informed massage therapist, offering medical and sports massage, cupping, scraping, and Reiki. Our space has offerings such as red light therapy, sound lounge, sauna, halotherapy. With intentions to expand our services

Together, we created Hybrid Healing as a sanctuary where people feel safe, understood, and supported on every level—physically, emotionally, and energetically. Our clients receive care from two practitioners who not only have advanced training, but who share a mission: to help our community feel whole again. This fusion of clinical skill, bodywork, and compassionate partnership is what truly sets us apart.

Challenges: As a growing family-owned wellness collective, we have overcome significant challenges while working to keep our vision alive. Over the past several years, we have faced serious financial hardships, including being close to bankruptcy, compounded by medical debt and educational debt

accumulated while pursuing the licenses, certifications, and training required to offer safe, high-quality care.

Raising and caring for four children while building a business has brought additional obstacles. We have had periods without the ability to afford reliable childcare, requiring the mother to remain mostly at home, limiting consistent work hours and slowing business growth. We have also carried the burden of court-related legal fees, which intensified financial strain during an already difficult period.

Despite these barriers, we have remained committed to serving our community and building a safe, holistic healing space. These challenges have taught us resilience, resourcefulness, and deep compassion—and they are why grant funding would make a transformative difference at this stage of our growth.

Supports: We do not have support

Extracurricular: Our family places a strong emphasis on connection, togetherness, and living a balanced, healthy lifestyle. Outside of our work in holistic wellness, we prioritize activities that allow us to bond, recharge, and stay grounded. We enjoy family game nights, camping trips, and hiking, which help us stay active and connected to nature. We regularly visit local farmers markets, supporting small businesses and choosing fresh, local foods. Some of our favorite moments are movie nights in the backyard with a projector, creating simple but meaningful memories together.

These activities reflect our values—community, wellness, quality time, and intentional living—which also shape the way we serve our clients and build our wellness practice.

Awards:

Keywords: 1. Red light therapy

2. Salt cave therapy

3. Wellness studio renovation
